## **Subdomains**

The subdomain refers to the first part of a domain. The most used subdomain in domain names is 'www' but there are also other subdomains, such as 'shop' or 'wiki'. The following chart shows how man domains use subdomains (other than www).

## **Distribution**

The number of subdomains used by a website tells something about the size of the website. Big companies tend to have multiple subdomains. The following charts show how many subdomains website have if they use subdomains and what names the used most often for a subdomain.

## Top 10 subdomians

In the following chart we display the top 10 subdomains and how many domains use that subdomain. The subdomain refers to the first part of a domain.
