## Heartbeat

Every month we index all the website we track again and update all the varaiables . Besides updating we also archive all the result and keep track of all the changes. The monthly number of weighted changes result in a heartbeat.

## Heartbeat

## **Pulse**

Not every change has the same importance. Changing the CMS of a website has a higher impact then only adding another email address to a contact page. By weighting every changing variable we calculate a pulse. Basically the strength of the pulse indicates if a website is being used and maintained by its owners or not.
